Professional Summary

Computer Science Engineering graduate with strong DSA foundation and hands-on experience building scalable full-stack and backend services using **TypeScript**, **Node.js**, **PostgreSQL**, **Next.js**, and **Prisma**. Proven track record developing production-grade **RESTful APIs**, real-time features, AI-powered tools, and cloud deployment platforms on **AWS** (SQS, EC2, ECR, EKS). Experienced in writing unit tests and maintaining reliable production systems.

Professional Experience

INFINA AI — **Chennai, India**
Full Stack Founding Engineer Intern — *Mar 2025 – Sep 2025*

- Architected and operated scalable cloud services serving **10K+ users** with **99.9% uptime**; optimized **Node.js** backends and **PostgreSQL** using **Redis**, cutting page load time by **40%**.
- Built production backend services and **RESTful APIs** with real-time **WebSockets**, secure auth (**JWT**, **OAuth**), and performance monitoring for live traffic.
- Wrote unit tests for core backend logic and APIs; led Agile sprints and code reviews that contributed to a **35%** rise in user engagement.

Vistaran Technotrix — **Chennai, India**
Full Stack Developer Intern — *Jul 2024 – Sep 2024*

- Developed cloud-hosted job platform managing **100K+ records** with **Next.js** and **PostgreSQL**; improved query performance by **30%** via indexing and **Prisma** optimizations.
- Designed modular microservices architecture following clean code and **REST API** standards; wrote unit tests for critical modules.

Technical Skills

Core Languages & DSA: JavaScript, TypeScript, Java, SQL, Data Structures, Algorithms
Frontend: React.js, Next.js, Tailwind CSS, Shadcn/UI, React Query
Backend: Node.js, Express.js, tRPC, RESTful APIs, WebSockets, Microservices
Cloud & Infra: AWS (SQS, EC2, ECR, EKS), Docker, Kubernetes, Helm, CI/CD, Vercel
Databases & Tools: PostgreSQL, Prisma ORM, MongoDB, Redis, Neon
Testing & Quality: Unit Testing (Jest/Vitest), pnpm test scripts
Additional: Authentication (JWT, OAuth, Clerk), Inngest, Google Gemini AI, E2B, Pinecone

Technical Projects

Shanode – Vercel-like Deploy Platform GitHub Live
Next.js, tRPC, AWS SQS/EC2/ECR/EKS, Docker, Helm, Prisma — *2026*

- **Problem:** Developers need a simple way to import GitHub repos and get instant preview deployments with environment variables.
- **Solution:** Built a mini PaaS with GitHub OAuth, async SQS job queue, EC2 worker that builds Docker images, pushes to ECR, and deploys to EKS via Helm with Ingress URLs.
- **Impact:** Delivers live deployment status + build logs and returns `app-<id>.devs24.com` URLs; demonstrates end-to-end cloud infrastructure and multi-tenant deploy pipelines.

ZUP – AI Web App Builder GitHub Live
Next.js, TypeScript, Prisma, PostgreSQL, tRPC, Google Gemini, E2B — *2025*

- **Problem:** Developers need faster prototyping of full-stack apps from natural language without boilerplate.
- **Solution:** Built AI agent platform generating production-ready code + live previews using Gemini + E2B; included unit tests.
- **Impact:** Enables instant UI clones and dashboards with Clerk auth and Inngest jobs in a production cloud environment.

Education

Bharath Institute of Higher Education and Research — **Chennai, India**
B.Tech Computer Science and Engineering, CGPA: 8.67/10 — *2022 – 2026*

Senior Secondary (12th)
Percentage: 86.8% — *2022*

Secondary (10th)
Percentage: 93.8% — *2020*

Certifications

Oracle Certified Foundations Associate – Agentic AI — **July 2026**
Oracle University — *Credential ID: 329933500AAI26OFA*
